OBJECTIVE

To secure a challenging position as a backend developer, utilizing my extensive experience in Laravel framework to develop robust and scalable web applications, while continuously learning and expanding my skills to deliver innovative solutions that meet the changing needs of the industry

EXPERIENCE

WEB DEVELOPER

Alqeeq Co. Gaza , Gaza Strip | Nov 2022 - Present

- Designed and implemented RESTful APIs to allow communication between the front-end and the database.
- Built and maintained databases using MySQL, ensuring their scalability and optimal performance.
- Developed server-side logic and integration with third-party services, such as payment gateways and email providers.
- Implemented security measures, such as password hashing and data encryption, to protect sensitive information.
- Debugged and resolved issues related to server-side performance and functionality.
- Collaborated with front-end developers and other stakeholders to ensure a seamless user experience.
- Utilized version control systems, such as Git, to manage code changes and ensure collaboration among team members.

FULL STACK DEVELOPER

Freelancers Website. Gaza, Palestine | May 2020 - Present

- Design and implement server-side architecture for web-based applications using the Laravel framework.
- Write clean, maintainable, and efficient PHP code to develop custom Laravel applications.
- Utilize Laravel's built-in tools, such as routing, middleware, and migrations, to create a scalable and secure application.
- Work with front-end developers to integrate user-facing elements with server-side logic, ensuring a seamless user experience.
- Implement RESTful APIs and Microservices to allow communication between different parts of the application.
- Collaborate with other developers, designers, and stakeholders to identify and prioritize features and requirements.
- Design and implement database systems, utilizing Laravel's Eloquent ORM to interact with databases such as MySQL, PostgreSQL, and SQLite.
- Debug and troubleshoot issues in the Laravel application and implement fixes as needed.
- Stay up-to-date with the latest Laravel features and best practices to ensure the application is always up-to-date and secure.
